Office Action Summany	09/902,550	DETMERS ET AL.				
Office Action Summary	Examiner	Art Unit				
	Dan Colilla	2854				
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.13 after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply If NO period for reply is specified above, the maximum statutory period we Failure to reply within the set or extended period for reply will, by statute, Any reply received by the Office later than three months after the mailing earned patent term adjustment. See 37 CFR 1.704(b).	66(a). In no event, however, may a reply be tir within the statutory minimum of thirty (30) day iffiliapply and will expire SIX (6) MONTHS from cause the application to become ABANDONE	mely filed ys will be considered timely. In the mailing date of this communication. ED (35 U.S.C. § 133)				
Status						
1) Responsive to communication(s) filed on 06 No	ovember 2003 and 17 November	r 2003.				
<u> </u>	_					
3) Since this application is in condition for allowan	3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is					
closed in accordance with the practice under E	closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.					
Disposition of Claims						
4) Claim(s) 1-71 is/are pending in the application.						
4a) Of the above claim(s) is/are withdrawn from consideration.						
5)⊠ Claim(s) <u>57-71</u> is/are allowed.						
6) Claim(s) <u>15,16,18-21,23-26 and 28</u> is/are reject	6)⊠ Claim(s) <u>15,16,18-21,23-26 and 28</u> is/are rejected.					
7)⊠ Claim(s) <u>1-14,17,22,27 and 29-56</u> is/are objected to.						
8) Claim(s) are subject to restriction and/or election requirement.						
Application Papers						
9)☐ The specification is objected to by the Examiner.						
10)⊠ The drawing(s) filed on <u>10 July 2001</u> is/are: a)⊠ accepted or b)□ objected to by the Examiner.						
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).						
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).						
11)☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.						
Priority under 35 U.S.C. § 119						
 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of: 1. Certified copies of the priority documents have been received. 						
2. Certified copies of the priority documents have been received in Application No						
3. Copies of the certified copies of the priority documents have been received in this National Stage						
application from the International Bureau (PCT Rule 17.2(a)).						
* See the attached detailed Office action for a list of the certified copies not received.						
Attachment(s)

Application/Control Number: 09/902,550

Art Unit: 2854

DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "accessory accommodated in the recess" as recited in claim 57, must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Note that the specification currently states that this structure is not shown (page 21, lines 19-22). The specification should be amended to remove this language when supplying the drawing showing this structure.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Objections

2. Claims 1-14 and 29-56 are objected to because of the following informalities:

In the amendment added to claims 1, 29 and 43, applicant recites "an additional varnishing mechanism." This implies that a first varnishing mechanism has previously been recited. However, this is not the case. This objection could be overcome by replacing, "an additional" with --a--.

Appropriate correction is required.

Application/Control Number: 09/902,550 Page 3

Art Unit: 2854

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claims 15-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Sugiyama et al. (US 5,406,888).

With respect to claim 15, Sugiyama et al. discloses an accessory configuration including an accessory 61-67, a connection mechanism 55 as shown in Figure 7 of Sugiyama et al. The link mechanism 55 has a first pivot axis at the bottom or rod 60 and a second pivot axis at the top of rod 60 as shown in Figure 7. Both axes are located outside of the printing unit 1,47, are parallel to the axes of the printing unit 1,47 and the second pivot axis is located above the printing unit 1,47.

With respect to claim 16, the printing unit 1,47 has parts 1 and 47 and the accessory 61-67 (specifically portions 65-66) that project into the printing unit 1,47.

5. Claim 15 is rejected under 35 U.S.C. 102(b) as being anticipated by Kumaki et al. (JP 05-77412).

Kumaki et al. discloses an accessory configuration including an accessory 24 and a connection mechanism 25 as shown in Figure 8-10 of Kumaki et al. The connection mechanism moveably fastens the accessory 24 to the printing unit frame 9 as shown in Figure 8. The connection mechanism has a first pivot axis 31 and a second pivot axis 30 as shown best in

Application/Control Number: 09/902,550 Page 4

Art Unit: 2854

Figure 9. The second pivot axis 30 is disposed outside of the printing unit 1 as shown in Figure 7 of Kumaki et al. Both pivot axes 30 and 31 are parallel to the axis of printing unit 1 with the second pivot axis located above the printing unit as best shown in Figures 7 and 9.

Claim Rejections - 35 USC § 103

- 6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 7. Claims 18-19 and 23-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sugiyama et al. (US 5,406,888), as applied to claims 15-16 above, and further in view of Rudewitz et al. (US 6.142,072).

With respect to claims 18 and 23, Sugiyama et al. discloses the claimed accessory configuration except for the means for centering the accessory. However, Rudewitz et al. teaches an accessory which includes a means for centering 34 as shown in Figures 1 and 3 (Rudewitz et al., col. 6, lines 58-61). It would have been obvious to combine the teaching of Rudewitz et al. with the accessory configuration disclosed by Sugiyama et al. for the advantage of preventing the accessory from becoming misaligned during operation.

With respect to claims 19 and 24, Rudewitz et al. teaches locking bolts 13-14 that fit into engagement members 17-18 (Rudewitz et al., col. 7, lines 49-52).

Art Unit: 2854

8. Claims 18, 20-21, 23 and 25-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sugiyama et al. (US 5,406,888) in view of Haramia et al. (US 3,611,923).

With respect to claims 18, 20, 23 and 25, Sugiyama et al. discloses the claimed accessory except for the prism shaped centering means. However, Haramia et al. teaches a centering means 44 for an accessory as shown in Figures 3-4 of Haramia. Bolts 48 pass through this centering means 44. While this centering means does not include a prism, the only difference between a prism and the centering means 44 is the sharpness of the curve of the engaging surface. It would have been obvious to combine the teaching of Haramia et al. with the accessory disclosed by Sugiyama et al. for the advantage of properly aligning the moving parts of the accessory with respect to the printing unit every time the accessory is engaged or disengaged. It would have been obvious to one of ordinary skill in the art through routine experimentation to adjust the sharpness of the curve according to the degree of accurate positioning that is required.

With respect to claims 21 and 26, the centering means 44 is a stop.

9. Claim 28 is rejected under 35 U.S.C. 103(a) as being unpatentable over Sugiyama et al. (US 5,406,888) as applied to claims 15-16 above, and further in view of Beisel et al. (US 5,479,858).

Sugiyama et al. discloses the claimed accessory configuration except for the spring.

However, Beisel et al. teaches an accessory configuration with a connection mechanism including a spring 23 as shown in Figure 1 of Beisel et al. In col. 8, lines 36-31, Beisel et al. teaches that the spring 23 could also be a pneumatic element 46 thus establishing that they are

Application/Control Number: 09/902,550

Page 6

Art Unit: 2854

mechanical equivalents. Sugiyama et al. discloses an air cylinder 51 which assists in the pivoting of connection mechanism 55. It would have been obvious to replace the air cylinder 51 disclosed by Sugiyama et al. with the spring taught by Beisel et al. because they are mechanical equivalents.

Allowable Subject Matter

- 10. Claims 57-71 are allowed.
- 11. Claims 1-14 and 29-56 are objected to for containing the above mentioned informalities, but would be allowable if rewritten to overcome these informalities.
- 12. Claims 3, 8, 13, 17, 22 and 27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

- 13. Applicant's arguments with respect to the above rejected claims have been considered but are most in view of the new ground(s) of rejection.
- 14. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dan Colilla whose telephone number is (703) 308-2259. The examiner can normally be reached Tues.-Fri. between 7:30 am and 6:00 pm. Faxes regarding this application can be sent to (703) 872 9306.

Application/Control Number: 09/902,550
